Why Choose HSC Home Care, LLC?

“Having a home health care aide for our daughter a few hours a week has given us the opportunity to take care of ourselves. Our daughter’s face lights up when her aide walks through the door every week. The staff is always courteous and responsive whenever we call. We have had a great experience.” — Jen L.

Our philosophy: As a community health provider, our mission is to ensure that our clients and their families have access to quality rehabilitative and specialty care services in the comfort of their homes and community in a manner that is culturally appropriate.

Reliable, skilled and dedicated professionals: Our team consists of energetic and compassionate registered nurses, licensed practical nurses, home health aides, personal care aides, licensed clinical social workers, and occupational, physical and speech therapists.

A range of services and flexible schedules: We use a multidisciplinary approach to meet each client’s individual needs and maintain open communication with primary care providers. We establish a positive relationship with your health care provider to ensure you get the best care possible.

Top industry standards: HSC Home Care, LLC is accredited by the Community Health Accreditation Program (CHAP), an independent accrediting body for community-based health care organizations. CHAP accreditation demonstrates that HSC Home Care meets the highest quality standards.

HSC Home Care, LLC is part of The HSC Health Care System, a nonprofit health care organization with more than 100 years of experience. The System combines the resources of a care coordination plan, pediatric specialty hospital, home health agency and parent foundation to offer a comprehensive approach to caring, serving and empowering individuals with disabilities.

HSC Home Care, LLC

When your child needs medical care at home, HSC Home Care, LLC is there to provide a flexible and individualized plan to meet your care needs.

Whether it is a well mom visit or transitional care for special health care needs, we offer family-centered care in the home as well as one-on-one training to support your child and family. We are here to help you feel comfortable taking care of your child’s health and using medical equipment at home, with the goal for you to become as independent as you can in carrying out your child’s care plan.

About Us

HSC Home Care, LLC is a Medicaid/Medicare certified home health agency that is located and licensed in the District of Columbia, and dedicated to providing home care services to infants, children and young adults with complex disabilities in a familiar environment. We also operate as a residential service agency in the state of Maryland, which allows us to provide home health services in the District of Columbia and in the neighboring counties in Maryland.

Focused, Pediatric Care Is What We Do Best

Our clients range from infants to young adults up to age 21 with complex disabilities that can include developmental delays, cerebral palsy or brain injuries. We take pride in promoting a nurturing environment of community-based care that enables those we serve to learn, play and grow while receiving the medical care they need in the comfort of their home.

We also strive to help each client’s family by connecting families with special health care needs to essential community resources for job assistance, financial counseling, food banks, child recreation, education and more.

OUR SERVICES

Skilled Nursing (RN & LPN)

Our registered and licensed practical nurses will observe each new client to assess individual care needs, and then work with the family to carry out a physician’s plan of care. Skilled nurses also help teach families about medication management, home safety and other issues to encourage independence.

Home Health and Personal Care Aides

Home health aides and personal care aides with HSC Home Care are trained to recognize developmental milestones and the value of therapeutic play. They can perform tasks to help with daily living, such as bathing, dressing and toiletry needs, as well as assist with medication, meal preparation and laundry.

Respite Care

Raising a child with a chronic illness or disability can present many challenges and there may come a point that you need some time away from being a caregiver. Respite care is an essential part of the overall support that families need to keep their child with a disability or chronic illness at home.

Rehabilitative Therapies

Every client receives a comprehensive assessment to develop individualized treatment plans that will support the family in reaching their maximum milestones. Therapy treatment plans can include physical therapy, occupational therapy and speech/language therapy.

Client/Caregiver Education

Each family is given a learning assessment during the admission process and all services are provided in an open learning environment. Our team will work to show you how to perform procedures or treatments that are part of your child’s care plan, in a way that best meets the needs of your family.

Licensed Clinical Social Workers

Our licensed clinical social workers are available to assist with financial, social and emotional concerns in order to help you cope with challenges. They also connect families with community resources to address housing, food and other health issues that may impact the ability to follow medical recommendations.

Well Mom and Baby Visits

Mothers are given lots of information during their hospital stay on how to take care of a new baby, but when you get home, you may find that you need a little help. HSC Home Care offers well mom and baby visits to make sure you and your baby are adjusting to being home.

Infusion Therapy

HSC Home Care offers infusion therapy in the home for children who need to receive medication through a needle into a vein (using an IV bag). Our nurses are trained to administer this type of intravenous therapy to provide hydration and nutrition support or other prescribed medications.
